DETAILED ACTION

Claims 1-4, 12-19 and 28-31 are pending in the application

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: Applicants have disclosed 5,260 "molecular compounds" species in which a number of the said compounds are distinct from each other based on their different classification. These molecular compounds are selected from the group consisting of hydrates, solvates, adducts and clatrate compounds having a phenol derivative as a constituent. The phenol derivative may be as simple as a phenol moiety (only hydrogen on the benzene ring) or a derivative which may have numerous classes of substituents, selected from halogens, alkyl groups, alkenyl groups, alkoxy groups, hydroxyl groups, amino groups, etc.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

A telephone call was made to Dennis G. LaPointe on 12/17/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elvis O. Price whose telephone number is 703 605-1204. The examiner can normally be reached on 8:30 am to 5:00 pm; Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann R. Richter can be reached on 703 308-4532. The fax phone
